SRU H2S：条件残差反馈 A 的两个开发候选

同期估计 y(t)；当前过程量可见、当前目标不可见。KC/W/A 删除后分别独立重训。

开发段已反复用于研究，区间未校正搜索；对最强基线的配对区间仍跨零。保留尾段未开启。

基线保留此前更强的冻结 ADAPTIVE_ARX；延迟 4 用有限 Urysohn KC，延迟 16 用线性过程 KC。
